

## Create a Green Development Checklist Recertification Questionnaire

When recertifying the Green Development Checklist, the municipality must submit an evaluation of the Checklist and its implementation. The review should cover the period from initial certification through the recertification application. Please complete the questions below and upload the document to your action submission.

The review, must include, the following steps:

- A. Retain the Green Development Checklists for each application in a consolidated file to make the review easier to conduct
- B. Review the Green Development Checklists and answer the following five questions:

**1. How many Green Development Checklists were filled out?**

239

**2. List the top five check off by applicants.**

Storage and Collection of Recyclables

Development Density and Community Connectivity

Site Selection

Reduce Soil Erosion

Stormwater Design (Quantity Control & Quality Control)

**3. List the top five actions implemented.**

Storage and Collection of Recyclables

Development Density and Community Connectivity

Site Selection

Reduce Soil Erosion

Stormwater Design (Quantity Control & Quality Control)

**4. What are some of the challenges encountered with the implementation of these actions?**

The Development Density and Community Connectivity action and the Site Selective action are the result of developments being located in a developed municipality. The other actions are normal actions for new developments.

## Create a Green Development Checklist Recertification Questionnaire

**5. Will the municipality mandate any of these actions? Yes/No, then please explain.**

No. Municipalities can require the checklist to be filled out, but cannot require checklist actions to be implemented. Some of these actions are already mandated by NJ state law and the construction code, which is why they were checked off/implemented by the most applicants.

**C. Specify the time-period in which this review was performed, e.g. date of certification to the date of re-certification application.**

June 2013 (initial) through April 2021
