

Greenable Woodbridge is Capturing Food Waste from Schools and Township Buildings and Turning it into Energy!

All Woodbridge schools & the Woodbridge Community Center Snack Bar are now part of an exciting program to help reduce the amount of food waste that flows to landfills.

According to Waste Management, world-wide one-third of all food goes uneaten, and as such, this leads to increases in harmful atmospheric gases (GHG's), and tons of waste being sent to landfills. This program seeks to combat that paradigm through a unique approach to best ensure sustainability practices in reference to the manner by which we live our daily lives. Stayed tuned for more updates on this exciting initiative during the school year!
